THE RV EXPERIENCE

Salt Lake City | March 12-14, 2019

Berbenno, March 8th 2019

**FILIPPI 1971 WILL BE DISPLAYING ITS NEWEST PRODUCTS AT RVX:
THE RV EXPERIENCE, MARCH 12-14 IN SALT LAKE CITY**

For the first time **FILIPPI 1971**, the Italian leader company in the furniture industry for the RV industry, will be exhibiting its latest products, including the VittEr® and new concept benchtop and table systems made with carbon-fiber composites, at the RV Industry Association's (RVIA) first-ever **RVX: THE RV EXPERIENCE**, at the Calvin L. Rampton Salt Palace Convention Center in Salt Lake City, Utah, March 12-14.

FILIPPI 1971 is thrilled to be showcasing its newest, most interesting, and most groundbreaking achievements, developed by its own R&D department, taking the RV industry to new heights.

Salt Lake City | March 12–14, 2019

FILIPPI 1971 will be featuring the **VittEr®**, the next-generation compact laminate with no formaldehyde release and **carbon-fiber composite furniture components**, totally new to the RV market worldwide.

Francesca Filippi, Sales Manager at FILIPPI 1971:

“We couldn’t be happier to take advantage of the amazing platform at the Show to introduce our most up-to-date products and unveil the world of possibilities that our manufacturing skills can bring to inspire and empower OEM’s to reach new design and material concepts in their motorhomes, caravans and trailers. We expect a very positive response from the RV industry that we are meeting under the same spotlight: we are promoting new product concepts for the component parts that are the result of years of technical researches made by FILIPPI LAB, our R&D department that can boast true talented engineers”.

Ivo Bolis, also sales Manager at FILIPPI 1971:

“The mockup of a van will be on display with the various furnishing components clearly visible, to show visitors some different technical and stylistic solutions using our VittEr®. Yet it is with our carbon fiber composite products that we are ready to bring real, important news into the RV sector.

The logo for RVXX features the letters 'RV' in a dark blue, bold, sans-serif font. The 'R' has a gold-colored diagonal element on its left side. To the right of 'RV' is a large, stylized 'XX' in a gold color, composed of thick, overlapping lines that create a sense of depth and movement.

THE RV EXPERIENCE

The combination of high quality and low weight is our goal to offer the OEMs advanced-technology products”.

ABOUT FILIPPI 1971:

FILIPPI 1971 is a family-owned and -run Italian company which started in 1971 as a supplier of semi-finished products for the furniture industry and then entered the RV and naval sectors around the year 2000. Ever since FILIPPI 1971 started working in the RV industry, there has been an increasing number of innovations they brought to the international market, also thanks to the partnership with Giorgio Levoni srl: the introduction of a melamine press allows the production of customized laminates based on the customer's design. The wooden panels can be further customized thanks to digital printing: two plotters are at the company's disposal to create multiple effects on the surface, satisfying the most personalized requests of the customers, in combination with 3D surface effects.

After years of researches, the VittEr® was launched at the end of 2016: it is a modern, high-performing compact laminate, highly customizable, anti-scratch, fire-retardant (BS2DO certified) and water-resistant, also tested for outdoor use under the action of atmospheric agents. It is a laminate with zero formaldehyde emissions also suitable for contact with food. Thanks to these characteristics, it is highly recommended for any use in kitchens and bathrooms of RVs. Its high mechanical strength makes it possible to create

solid slabs with reduced thickness, while the full color in the core allows to create unique effects with the wide range of available colors, also customizable with digital printing and combinable with other in-house made surfaces too.

More than just a simple manufacturer of laminated panels, FILIPPI 1971 is a company able to produce not only flat elements, but also curved components and complete, complex furnishing kits, already assembled if requested, too.

The company is ISO:9001, PEFC and FSC certified.
